

Page 1 - Matter

Matter has mass and occupies space.

Practice Questions (QE)

1. Define matter.
2. Differentiate solids and liquids.

Page 2 - Atomic Structure

Atoms contain protons, neutrons and electrons.

Practice Questions (QE)

1. What is an atom?
2. State the charge of an electron.

Page 3 - Periodic Table

Elements are arranged by atomic number.

Practice Questions (QE)

1. Define atomic number.
2. Name the first ten elements.

Page 4 - Chemical Bonding

Atoms form ionic and covalent bonds.

Practice Questions (QE)

1. Differentiate ionic and covalent bonds.
2. Give one example of each.

Page 5 - Chemical Reactions

Chemical reactions rearrange atoms.

Practice Questions (QE)

1. What is a balanced equation?
2. Balance $\text{H}_2 + \text{O}_2 \rightarrow \text{H}_2\text{O}$.

Page 6 - Acids, Bases and Salts

Acids, bases and salts have different properties.

Practice Questions (QE)

1. Define an acid.
2. What is the pH of a neutral solution?

Page 7 - Metals and Non-metals

Metals and non-metals have distinct characteristics.

Practice Questions (QE)

1. Name three metals.
2. State two properties of non-metals.

Page 8 - Carbon Compounds

Carbon forms organic compounds.

Practice Questions (QE)

1. What is catenation?
2. Give the formula of methane.

Page 9 - Environmental Chemistry

Chemistry explains pollution and environmental effects.

Practice Questions (QE)

1. What causes acid rain?
2. Define greenhouse gases.

Page 10 - Revision

Summary of major chemistry topics.

Practice Questions (QE)

1. State the law of conservation of mass.
2. Differentiate physical and chemical changes.
