

Page 1 - Real Numbers

Real numbers include rational and irrational numbers. Euclid's Division Lemma, HCF, LCM, and prime factorization are fundamental topics.

Practice Questions (QE)

1. Find the HCF of 96 and 144.
2. Express 540 as a product of prime factors.

Page 2 - Polynomials

A polynomial consists of variables and coefficients. Learn degree, zeros, and factor theorem.

Practice Questions (QE)

1. Find the zeros of x^2-5x+6 .
2. Find $\alpha+\beta$ if roots are of $x^2-7x+10$.

Page 3 - Linear and Quadratic Equations

Linear equations are solved by substitution or elimination. Quadratic equations use factorization or quadratic formula.

Practice Questions (QE)

1. Solve $2x+y=7$ and $x-y=2$.
2. Solve $x^2-9x+20=0$.

Page 4 - Trigonometry

Study sin, cos, tan, identities, and applications in heights and distances.

Practice Questions (QE)

1. Find $\sin 30^\circ$, $\cos 60^\circ$, $\tan 45^\circ$.
2. A pole casts a 10m shadow at 45° . Find height.

Page 5 - Statistics and Probability

Statistics summarizes data. Probability measures the chance of an event.

Practice Questions (QE)

1. Mean of five numbers is 24. Find sum.
2. Probability of getting an even number on a die.

Page 6 - Arithmetic Progressions

Arithmetic progressions have a common difference and n th-term formulas.

Practice Questions (QE)

1. Find the 20th term of 5,8,11...
2. Find the sum of first 25 terms.

Page 7 - Coordinate Geometry

Distance formula, section formula and area of triangle are key concepts.

Practice Questions (QE)

1. Find the distance between $(2,3)$ and $(8,11)$.
2. Find midpoint of $(4,6)$ and $(10,2)$.

Page 8 - Circles

Tangents to a circle are perpendicular to the radius at the point of contact.

Practice Questions (QE)

1. State the tangent theorem.
2. Draw a tangent to a circle.

Page 9 - Surface Areas and Volumes

Study cubes, cuboids, cylinders, cones and spheres.

Practice Questions (QE)

1. Find volume of a cylinder with $r=7$ cm and $h=10$ cm.
2. Find TSA of a cube of side 8 cm.

Page 10 - Probability Revision

Revision of experimental and theoretical probability.

Practice Questions (QE)

1. A bag has 5 red and 7 blue balls. Find $P(\text{red})$.
2. Toss two coins. Find probability of exactly one head.
