

Page 1 - Real Numbers

Real numbers include rational and irrational numbers. Euclid's Division Lemma, HCF, LCM, and prime factorization are fundamental topics.

Practice Questions (QE)

1. Find the HCF of 96 and 144.
2. Express 540 as a product of prime factors.

Page 2 - Polynomials

A polynomial consists of variables and coefficients. Learn degree, zeros, and factor theorem.

Practice Questions (QE)

1. Find the zeros of x^2-5x+6 .
2. Find $\alpha+\beta$ if roots are of $x^2-7x+10$.

Page 3 - Linear and Quadratic Equations

Linear equations are solved by substitution or elimination. Quadratic equations use factorization or quadratic formula.

Practice Questions (QE)

1. Solve $2x+y=7$ and $x-y=2$.
2. Solve $x^2-9x+20=0$.

Page 4 - Trigonometry

Study sin, cos, tan, identities, and applications in heights and distances.

Practice Questions (QE)

1. Find $\sin 30^\circ$, $\cos 60^\circ$, $\tan 45^\circ$.
2. A pole casts a 10m shadow at 45° . Find height.

Page 5 - Statistics and Probability

Statistics summarizes data. Probability measures the chance of an event.

Practice Questions (QE)

1. Mean of five numbers is 24. Find sum.
2. Probability of getting an even number on a die.
