

Chemistry - 10 Sample Chapters with Questions & Answers

Chapter 1: Matter

Summary: This chapter introduces the basic concepts of matter.

Question: What is matter?

Answer: Matter is anything that has mass and occupies space.

Chapter 2: Atomic Structure

Summary: This chapter introduces the basic concepts of atomic structure.

Question: What is an atom?

Answer: An atom is the smallest unit of an element that retains its chemical properties.

Chapter 3: Periodic Table

Summary: This chapter introduces the basic concepts of periodic table.

Question: What is the periodic table?

Answer: It is the arrangement of elements in order of increasing atomic number.

Chapter 4: Chemical Bonding

Summary: This chapter introduces the basic concepts of chemical bonding.

Question: What is an ionic bond?

Answer: An ionic bond is formed by transfer of electrons between atoms.

Chapter 5: Chemical Reactions

Summary: This chapter introduces the basic concepts of chemical reactions.

Question: What is a chemical reaction?

Answer: A process in which reactants are converted into products.

Chapter 6: Acids, Bases and Salts

Summary: This chapter introduces the basic concepts of acids, bases and salts.

Question: What is an acid?

Answer: An acid releases hydrogen ions (H^+) in aqueous solution.

Chapter 7: Metals and Non-metals

Summary: This chapter introduces the basic concepts of metals and non-metals.

Question: Name two properties of metals.

Answer: Metals are lustrous and good conductors of heat and electricity.

Chapter 8: Carbon Compounds

Summary: This chapter introduces the basic concepts of carbon compounds.

Question: What is catenation?

Answer: The ability of carbon atoms to bond with one another forming chains or rings.

Chapter 9: Environmental Chemistry

Summary: This chapter introduces the basic concepts of environmental chemistry.

Question: What causes acid rain?

Answer: Sulfur dioxide and nitrogen oxides reacting with water vapor.

Chapter 10: Revision

Summary: This chapter introduces the basic concepts of revision.

Question: State the law of conservation of mass.

Answer: Mass is neither created nor destroyed during a chemical reaction.
